## SYNOPSIS

### UN STAFF COMMITTEE

Frederic Siegenthaler, President of the United Nations Staff Committee, discusses the present relationship between the staff of the World Organization and the administration. He emphasizes that over the last few years working conditions have deteriorated for both professional and general service staff. Mr. Siegenthaler sees some merit in the restructuring process in the post-cold-war era. The emphasis has shifted to economic and social development, and the world body has to adapt to its new role.
